

'This Is a Game-Changer'

Our customers say it best: TempArmour® temperature-sensitive storage solutions deliver worry-free protection.

Up to 6 Days of Protection in a Power Outage

“

Ontario experienced one of the most damaging windstorms in living memory, which left many of us both struggling to cope without power for days. The TempArmour refrigerator performed absolutely as advertised through 77 hours without power with little variation in temperature range.

BRYCE M.

”

Designed for Daily Use

“

What I love about the TempArmour vaccine refrigerator is that the temperature fluctuates minimally. The usual fluctuation in a day is 0.3 to 0.4 degrees, even with opening the door/lid, because cool air drops instead of rising up and out of the fridge. My temp range is around 3.5 consistently.

”

Reliable Refrigerated and Frozen Temperatures

“

A few times over the summer our clinics lost power. Nobody had to run to the clinic in the middle of the night to take our vaccines to the hospital. The temperature stayed within range until the power went back on. It made our lives much easier with the dependable TempArmour fridges and freezers.

THERESA D.

”

Better Emergency Preparedness

“

We had fluke flooding and a tornado hit our town the SAME DAY in August 2023. For 48 hours, my pediatric clinic lost power. I had invested in both the TempArmour fridge and freezer just before this natural disaster occurred (just in case!). These purchases saved my office \$60,000 worth of vaccines.

SANA S.

”

In Range on the Go (Medical Coolers)

“

The TempArmour coolers we now have are doing great in transporting vaccines. We are planning to use these for all our cold-chain product transportation.

LAWRENCE R.

This is a game-changer for our vaccine clinic administrations.

PATRICIA M.

”

Customer-Driven Solutions

“

I appreciate all the extras that came with the refrigerator, like the labels and label holders, document holders with magnets, etc. It is evident that TempArmour really thought about what is needed for a vaccine refrigerator and decided to include that.

JANET S.
